#### THE WASHINGTON MONUMENT.

The bill appropriating \$200,000 for the completion of the Washington Monumont at the National capital has passed both houses of Congress and will undoubtedly be signed by the President. In its present unfinished condition this nonument is a most unsightly object, and we question whether it will ever be anything elso. In design and execucountry, and the only valid excuse for finishing it is the shame of having it remain unfinished. So far as architectural beauty or monumental effect is concerned, a square pile of diessed stone would be as beautiful and impressive. In fact, that is about all it will be when completed, and we have little doubt that the time will come, in some more cultivate I and exacting age, when it will be leveled to the earth, and a monument erected which shall fitly commemorate the name and deeds of Washington." This monument has had quite a his-

#### Physicians Cornered!

I suppose there is not in the whele of a physician's experience anything in human suffering which calls forth his sympathy and pity, to such an extent, as to witness the excruciating pains of a poor morfal suffering from the fearful disease of likeumatism. Heretofore there has been considerable diversity of opinion among medical men as to the true character of this disease, some locating it in the fibrous or muscular tissues of the system, and others viewing it as an acute nervous disorder, but it is now generally admitted to be a disease arising from a poison checitating in the blood, and further it is admitted that theumatism can never be thoroughly once without exterminating such poisonous matters from the blood by a constitutional internal remedy. We feel confident that none will be better satisfied and rejoice more than the conscientions physician, who has found out that a true cure for this stubborn disease has been diseavered. Pumps on short notice.

The advantages of this Pump over many others are many. The Chain being button-less, it is much lighter, consequently it is not liable to break, and works much easter. The RUBBER BUCKETS which are attached to the Chain will not wear the Tubing, consequently it will last longer than when Metal Buttons are used. It is, positively, ANTI-FREEZING. It is a positive WATER PHRIFIER, as each Bucket is constructed with an AIR CHAMBER, which carries a given quantity of pure air into the water, which immediately diffuses through the entire body of water, purilying and cleaning, and rendering it fit for use.
